

Don't Like to be Dilated?

Call today to make your appointment and receive 50% off an Optomap® retinal exam. Please mention this ad when scheduling: 713-827-8311

Optomap® can assist Dr. Yankelove in detecting ocular diseases such as:

A circular, multi-colored retinal scan image showing the fundus of the eye. The colors range from dark green and blue at the periphery to bright yellow and red in the center, highlighting the optic disc and macula. The image is slightly blurred, typical of a wide-field scan.

Hypertension

Macular Degeneration

Retinal Detachment

Glaucoma

Diabetic Retinopathy

Offer Expires: 1/31/2012
